BRIEF ABSTRACT OF LETTER

Refering to letter No 1509/Mez 250-33-4 of 14-5-34 Communicating the views of the Chief Engineer in respect of the water supply to Kyamenahalli Jatra grounds proposed by the Sanitary Engineer Explaining the position further in respect of the Scheme and requests Sanction to the estimate.

NOTES AND ORDERS

In January 1934 the M E Submitted for Sanction an estimate for Rs 13260/ prepared by the Sanitary Engineer for giving water supply Connections to the Jatra grounds of Sri Ajjeyanga Swami at Kyamenahalli Koratagere Tq.

2 The Chief Engineer who was consulted in the matter was of opinion that the

NOTES—First Sheet

WD 02552—GPB—5,000—10 7-30

the proposed service tank. (10000 gallons) was not adequate and pointed out certain other defects

Diary F

The above observations of the Chief Engineer were communicated to the M.C in this office letter of 14-5-34 and he was asked to take necessary action in consultation with the Director of Health. The present communication of the Dr of Health is with reference to the above letter. He has met the points raised by the Chief Engineer and requests in the circumstances explained that the estimate for Rs 13,260/- already submitted may be sanctioned

"I This will, if approved, be sent unofficially to the Chief Engineer for further remarks

Submitted for orders

Returned, with compliments.

2. The estimate for Rs 13,260 has been duly scrutinised in this office and may be sanctioned. As suggested by the Director of public Health, the present arrangement may be tried for 3 or 4 seasons and needful modifications effected in the light of experience gained.

3. I may however state that as the use for the pump &c., at Kyamenhalli is confined to a period of about 15 days in a year, it is desirable that the water supply scheme to Holavanahalli village should be developed at an early date and combined with this installation in order to keep it going throughout the year in the interests of efficiency and economy.

4. As far as possible, the position of the intake may be fixed above the contamination stretch of the river above the anicut.

2. In view of the public utility of the scheme which is entirely financed from the funds of the Mzrai Institution, the Establishment, Tools and Plant charges may be waived, as a special case, as in the case of water supply to Sri Ghati Subramanyaswamy Temple in the Dodballapur Taluk, with the concurrence of the Financial Secretary. It has however to be remarked that such waiving of the charges tends to raise the establishment charges in the Department.

Water Supply to Kyamenahalli Jatra grounds, Tumkur District.

SIR,

With reference to your letter No. 1009/Muz. 200- 33-4 dated 14th May 1934, I have the honour to explain the position furtner as follows.

The estimate for Rs. 3,960/- provides for a balancing tank of 10,000 gallons capacity and the discharge from it would be quite ample to feed the proposed 9 taps and 3 cattle troughs. Since the tap water will be used purely for drinking purposes, this quantity seems quite ample. About 2 gallons per head per day is more than ample for this purpose and the quantity of 80,000 gallons provided for would even suffice 40,000 people. The people come and go and there may not be any possibility of more than 10,000 people congregating there at one time. If the demand should increase, more water could be easily pumped through the 3" C.I. main by increasing the speed of the engine. The pump with a sufficient reserve capacity will be ordered for this. It is always the question of funds that is the limiting factor in all such water supply installations. If the funds permit, the capacity of the tank could be increased at any time by adding a second tank of equal capacity. The present arrangement may be tried for 3 or 4 seasons and then additions made if found necessary. I do not think it advisable to increase the initial outlay unless it is

is unavoidable. Further, the discharge through the taps and cattle troughs may not be such as to justify a bigger main and an elevated tank of greater capacity. The pumping will be done once a year for about 15 days utmost.

It is proposed to take up water supply to Holavanahalli for which a separate estimate is being prepared. This is likely to take some time. In the meantime, it is absolutely essential that the installation under proposal should be proceeded with immediately as the jatra is coming off in the month of February and risk of any cholera breaking out may be minimised.

I may incidentally note here that the engine and pump at Kharapur are kept in excellent condition and are being run now and again quite efficiently.

It has been pointed out that it may be possible to hire the pumping set from the Department of Industries and Commerce at the time of Jatra and that in case the Department of Industries could not spare, then this Department may keep one or two pumping units of steam or oil power and arrange to loan during jatras. I do not think that such an arrangement will be practicable. Under the circumstances, I request that you will be so good as to move Government to sanction the estimate.

The enclosures sent with your letter are retransmitted.

I have the honour to be,

Sir,

Your most obedient servant,

Director of Health.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

Read :—

Correspondence ending with letter No.C.766-10 dated 12th November 1934 from the Director of Health, requesting sanction (i) for the estimate for Rs.13,260 (including establishment, tools and plant charges) for water supply to Kyamenahalli jatra grounds, Tumkur District (ii) for waiving the establishment, tools and plant charges of Rs.1260 and (iii) for entrusting the execution of the work to the Sanitary Bureau. & Appended to this order

2. Unofficial notes Nos.66 and 79 dated 23rd November 1934 and 30th November 1934 reply of the Chief Engineer of Mysore on the subject.

O R D E R No. 848-51/ Mwz 116-34-2 Encfile Dir of Health

Dated, Bangalore, 10th December 1934. J & M C

The estimate is sanctioned for Rs.12,000, excluding the ~~xx~~ establishment, tools and plant charges amounting to Rs.1260 which are waived as a special case. The execution of the work will be entrusted to the Sanitary Bureau as recommended by the Director.

The present arrangement may be tried for 3 or 4 seasons and necessary modifications effected in the light of the experience gained. As the use ~~xx~~ for the pump etc., at Kyamenahalli is confined to a period of about 15 days only in the year, it is desirable that the water supply scheme to Holavanahalli village should be developed at an early date and combined with this installation in order to keep it going throughout the year in the interests of efficiency and economy. As far as possible, the position of the intake should be fixed above the contamination stretch of the river above the

Water Supply to Kyamenahalli Jatra grounds, Tumkur District.

With reference to your letter No.1509/Muz.250-33-4 dated 14th May 1934, I have the honour to explain the position further as follows:--

The estimate for Rs.15,260/- provides for a balancing tank of 10,000 gallons capacity and the discharge from it would be quite ample to feed the proposed 9 taps and 3 cattle troughs. Since the tap water will be used purely for drinking purposes, this quantity seems quite ample. About 4 gallons per head per day is more than ample for this purpose and the quantity of 80,000 gallons provided for would even suffice 40,000 people. The people come and go and there may not be any possibility of more than 15,000 people congregating there at one time. If the demand should increase, more water could be easily pumped through the C.I. main by increasing the speed of the engine. The pump with a sufficient reserve capacity will be ordered for this. It is always the question of funds that is the limiting factor in all such water supply installations. If the funds permit, the capacity of the tank could be increased at any time by adding a second tank of equal capacity. The present arrangement may be tried for 3 or 4 seasons and then additions made if found necessary. I do not think it advisable to increase the initial outlay unless it is unavoidable. Further, the discharge through the 9 taps and cattle troughs may not be such as to justify a bigger main and an elevated tank of greater capacity. The pumping will be done once a year for about 15 days utmost.

It is proposed to take up water supply to Holavanahalli for which a separate estimate is being prepared. This is likely to take some time. In the meantime, it is absolutely essential that the installation under proposal should be proceeded with immediately as the jatra is coming off in the month of February and risk of any cholera breaking out may be minimised.

I may incidentally note here that the engine and pump at Kharapur are kept in excellent condition and are being run now and again quite efficiently.

It has been pointed out that it may be possible to hire the pumping set from the Department of Industries and Commerce at the time of Jatra and that in case the Department of Industries could not spare, then this Department may keep one or two pumping units of steam or oil power and arrange to loan during jatras. I do not think that such an arrangement will be practicable. Under the circumstances, I request that you will be so good as to move Government to sanction the estimate.
